WORK EXPERIENCE

JP Enterprises Unlimited

Lead Web Application Developer

Lawrence, PA

Aug 2019-Current

- Developed and delivered cross-platform web applications for our stakeholders by leveraging different technologies depending on business requirements
- Built enterprise software using technologies including:
 - PHP, Laravel, Python, and SQL for custom APIs and RESTful web services
 - Vue, JavaScript, HTML, and CSS for response web experiences
 - Drupal and WordPress for content management
- Aided team members by teaching coding techniques and created components that can be reused across multiple projects. Examples include: custom landing pages, registration forms, and data capturing / manipulation / exporting scripts
- Delivered designs using Adobe Creative Suite based on company branding and style guides
- Helped to provide measurable insights to our marketing team and modernize our project management process which lead to improved client satisfaction.
 - Improved Google Analytics tracking to encompass the customer journey
 - Defined a holistic SEO strategy to strengthen our clients' web presence
 - Adopted Jira to enable cross-team understanding of project deliverables and milestones
- Advised and educated clients while managing and improving legacy applications for an upgraded user experience
- Administered training to stakeholders via custom user guides and in-person tutorials which results in increased client satisfaction
